

## **mobivention offers number-puzzle fun with Sudoku Supreme**

Published on 06/15/12

mobivention today introduces Sudoku Supreme 1.0, the popular Japanese number-puzzle game for iOS devices. A Sudoku puzzle is a grid of nine by nine squares which are divided into nine regions. The aim of the game is to fill the grid with digits from 1 to 9. Perfect for both beginners and advanced players alike, Sudoku Supreme comes with numerous features, such as save function and different board designs. Three difficulty levels guarantee fun for everyone.

Cologne, Germany - mobivention launches today the popular Japanese puzzle Sudoku Supreme with many features which guarantee a lot of fun for young and old. The gaming app is now available for download as a free version. A premium version is available for \$1.99. Both versions can be downloaded on the Apple App Store.

The puzzle has originally been invented by Howard Garns and was published in 1979 under the name Number Place. Afterwards, Sudoku was introduced to the Japanese market in April 1986 where it got the name "Sudoku".

Sudoku Supreme comes with numerous features, such as save function and different board designs. Help functions, such as the check function, make sure that the digits are placed in the right place. Sudoku Supreme is for beginners and advanced players. Three difficulty levels guarantee fun for everyone.

Three different field sizes (4x4, 6x6 and 9x9) and four different levels of difficulty make it suitable for both beginners and professional players. The small 4x4 grid is perfect for kids and the 6x6 grid helps beginners to start with Sudoku.

A Sudoku puzzle is a grid of nine by nine squares which are divided into nine regions. The aim of the game is to fill the grid with digits from 1 to 9. The challenge: Every horizontal row, every vertical column, every region can contain each digit only once.
