

HairerSoft releases Amadeus Pro 1.4

Published on 02/17/09

HairerSoft is proud to announce the release today of Amadeus Pro 1.4, their flagship multitrack audio editor for MacOS X. Version 1.4 adds two brand-new real-time analysis tools, improved batch processing, better handling of multi-track documents, new key shortcuts, as well as improved performance. It furthermore adds many small improvements to its user interface: audio editing has never been easier or more enjoyable. This is a recommended update to all Amadeus Pro users.

New York, USA - HairerSoft is proud to announce the release today of Amadeus Pro 1.4, their flagship multitrack audio editor for MacOS X. This new version brings two brand-new real-time analysis tools, improved batch processing, better handling of multi-track documents, new key shortcuts, as well as improved performance.

Amadeus Pro excels and is optimized for any audio-related task, such as live audio recording, digitizing tapes and records, converting between a variety of sound formats, etc. Thanks to its stellar direct-to-disk abilities and waveform caching, edits on arbitrarily large sounds, even beyond the usual 2GB limit, are performed nearly instantaneously.

The handling of large sounds is facilitated by the extensive support of markers. Its sound repairing and denoising abilities make Amadeus Pro particularly suited for transferring vinyl records to CD.

Some of the most noteworthy features of Amadeus Pro include:

- * Simple and elegant MacOS X - like user interface
- * Multitrack editing and recording.
- * Batch processing and conversion.
- * Sound denoising and repairing.
- * Supports a variety of sound formats, including Multichannel AIFF, Multichannel Wave, Mp3, Mp4, Ogg Vorbis, FLAC, SoundDesigner II, QuickTime, Apple CAF, etc.
- * Support for VST and Audio Unit plug-ins.
- * A "favourite actions" palette allows to have your most commonly used effects only a mouse click away.
- * A wide range of powerful audio analysis tools.
- * Audio CDs with CD-TEXT data can be burned directly from within Amadeus Pro.

Supported Languages:

- * English, French, German, Japanese, Italian, Spanish, Finnish and Danish

System Requirements:

- * Universal Binary; running natively on PowerPC and Intel machines.
- * Requires Mac OS X v10.4 or later.
- * 31 MB Hard Drive space.

Pricing and Availability:

Amadeus Pro is a \$40 (USD) shareware (\$25 upgrade for existing Amadeus II users).
