

## **Newly Updated Moonbase Goes Live with HTML5 on iOS, Android, Facebook**

Published on 06/26/12

South African based Maxxor Ltd. announces the release of a newly updated version of Moonbase for the iPhone, iPad, iPod touch, Android devices and Facebook. This wildly popular social multiplayer adventure challenges players to build a mining base on the moon, get rich by mining Helium-3 and fight other players to achieve dominance. Newly enhanced to take on the many advantages of HTML5, Moonbase now features an in-depth introductory tutorial, deeper Facebook integration, and improved gameplay.

Cape Town, South Africa - Maxxor, an innovative mobile application and software developer, today announces the release of a recently updated version of Moonbase for the iPhone, iPad, iPod touch, Android devices, and Facebook. An intensely social online game, Moonbase challenges players to build a mining base on the moon and get rich by mining precious Helium-3. This newly updated HTML5 enabled game goes live across multiple platforms and boasts an eclectic array of improvements all while keeping true to its fiercely competitive, combat soaked, yet socially engaging spirit. Moonbase is currently available for download on the App Store for free in the Games category, in Google Play for Android phones, and as a full Facebook game too!

This game perfectly blends classic strategic gaming elements with social interaction and interactive play on a truly massive scale. Gamers find themselves on the moon in the not-too-distant future, tasked to mine the precious element Helium-3 and send it to earth where it will be used as fuel for limitless fusion-based power. It's a simple premise, but succeeding in this game is anything but. Furthermore, the game has grown as a result of its most recent update too, now offering more to players than ever before.

A fully fleshed out tutorial module has been included to help novice players get accustomed to the Moonbase experience while enhanced integration with Facebook makes connecting, interacting, and gaming with friends even easier. Boasting about gameplay that's more fluid than ever before and more stable experience as a whole, it's safe to say that things have gotten sweeter on the technical side for the game too. That said, for all its improvements Moonbase still delivers the same awesome social gaming experience. It's still populated with thousands of other live Moonbase players vying for as much space loot as they can get their hands on. Players are free to interact with each other, in fact it's a must as without alliances players' moonbases are a target for anyone plotting a raid!

At its core Moonbase is a classic strategic MMORPG. Players have loads of choices to make and many different avenues to build their moon mining clout. Spend money reinforcing your base to keep it safe from unsavory players? Expand your mines and invest in better equipment to get rich quicker? In Moonbase the big decisions are always in the player's hands. The game is integrated with Facebook too, ensuring that finding friendly faces and connecting with other players up on the moon is always hassle-free. It's time to mine and meet new people, so grab your space helmet and head to the moon with Moonbase right from your iPhone, iPod touch or Android phone right now!
