

TapFactory introduces TapDial for iPhone - Speed Dialing Coming Soon

Published on 02/22/09

TapFactory Apps is proud to introduce TapDial, their soon to be released speed dial solution for iPhone. With TapDial you can create any number of custom speed dials on your Home Screen. Dial, SMS and Email is now at your fingertips. TapDial optimizes your speed dial to open immediately without any connection to the internet.

Newark, NJ - TapFactory Apps is proud to introduce TapDial, their soon to be released speed dial solution for iPhone. With TapDial you can create any number of custom speed dials on your Home Screen. Dial, SMS and Email is now at your fingertips. TapDial optimizes your speed dial to open immediately without any connection to the internet.

* TapDial allows you to add any number of custom speed dial icons to your Home Screen. Other apps require you to purchase an app for every speed dial.

* TapDial is fast. Other apps take 10-15 seconds to dial a call, TapDial is almost immediate.

* TapDial's beautiful graphics and intuitive user experience give it a major edge over competition.

* TapDial offers a library of over 40 (and counting) gorgeous icons to use as your speed dial icon. Don't junk up your Home Screen with the eye-sore icons that other apps offer!

* No other speed dial app offers so many features to customize your speed dial!

Feature Highlights:

* Add any number of custom speed dials to your Home Screen

* Set up your speed dial to make a call, send an SMS, send an email, or prompt you with all three options when the speed dial icon is tapped.

* TapDial is fully integrated with your address book, so adding a contact is a breeze. Either use your address book to enter automatically or choose to enter manually with the keyboard. TapDial will even ask you to use a contact's photo if there is one attached!

* When creating your custom speed dial icon, you have 4 options: (1) Use a contact's attached photo, (2) select from your camera roll, (3) take a photo and load it directly into TapDial, or (3) select from TapDial's library of gorgeous icons.

* Speed dials on your Home Screen are convenient, but vulnerable to accidental dialing. Protect your phone from dialing while in your pocket with TapDial's speed dial confirmation alert.

* TapDial optimizes your speed dial to open immediately without any connection to the internet!

Pricing and Availability:

TapDial for iPhone is only \$1.99 (USD) and soon to be available exclusively through Apple's App Store.
