

Class on Demand Makes Available Episode 5.1 Self-Paced Training Video

Published on 02/20/09

Class on Demand instructor Nate Caplin spearheads the 4.5 hour self-paced training offering an in-depth tour of the industry leading Episode and Episode Pro compression solutions from Telestream. The modular design of the self-paced training video is ideal for both beginners needing to step into the software to the seasoned pro needing to quickly learn the very latest Episode 5.1 features.

Hoffman Estates, IL - Class on Demand, a provider of professional educational products for creative markets, announced the availability of "Complete Training for Episode and Episode Pro 5.1". Class on Demand instructor Nate Caplin spearheads the 4.5 hour self-paced training offering an in-depth tour of the industry leading Episode and Episode Pro compression solutions from Telestream. The modular design of the self-paced training video is ideal for both beginners needing to step into the software and the seasoned pro needing to quickly learn the very latest Episode 5.1 features.

"Class on Demand is our go to training partner for the Episode products," comments Barbara DeHart, VP of Marketing at Telestream. "Instructor Nate Caplin does a great job demystifying multi-format, multi-distribution workflows while giving expert and engaging instruction on using Episode products to produce the very best content regardless of its production platform or distribution channel."

"Every editor today really needs to understand how to effectively use industry leading compression technology like Episode - it is part of their job. This is not an easy task given the number of formats and distribution channels that are continually being thrown into the mix," said Paul Holtz, CEO and founder, Class on Demand. "Our instructor Nate Caplin really does a fantastic job at simplifying these complexities while providing a very clear path for learning and mastering the powerful Episode technology."

"Complete Training for Episode and Episode Pro" covers every aspect of the Telestream encoding workflow. Class on Demand self-paced chapters are broken down into logical segments; user interface and features, understanding and using filters, compression settings for web, compression settings for mobile and portable media devices, compression settings for disc authoring and compression settings for editing and standards conversion. The modular approach enables students to focus on specific compression scenarios or step through the training in a non-linear approach best suited for their learning needs.

About the Episode Products

Episode is a powerful cross-platform desktop media encoding application for Mac and Windows. It offers the encoding for content repurposing for distribution to Web, DVD, mobile phones and portable media devices. Includes: extensive format support in/out including superior quality Flash 8/9 encoding, presets and filters, watch folders, batch processing of 25 jobs and Compressor plug-in.

Episode Pro is a powerful cross-platform desktop media encoding application that includes all the features and functionality of Episode plus support for advanced professional formats: MXF, GXF, H.264 High Profile, DVCPRO HD (with Final Cut Pro), mobile multi-bit rate and more with unlimited batch processing.

About Instructor Nate Caplin

A practitioner and seasoned conference speaker, Nate has presented compression technology sessions at both MacWorld Expo and Apple's World Wide Developer's Conference. He has been called upon by industry magazines such as DV Magazine to review new compression products and technologies. Nate has been a member of the Class on Demand team since 2006. His
