

HoudahGeo 1.1 - Photo Geocoding for the Mac

Published on 05/26/07

HoudahGeo is a one-stop geocoding application for the Mac. It allows you to link photos to the location where they were taken. This information may be written to EXIF tags, saved to Google Earth files or uploaded to Flickr.

Luxembourg - May 25, 2007 - Houdah Software s. à r. l. is excited to announce the immediate availability of HoudahGeo 1.1. HoudahGeo is a one-stop geocoding application for the Mac. It allows you to link photos to the location where they were taken. This information may be written to EXIF tags, saved to Google Earth files or uploaded to Flickr.

What's New:

- * HoudahGeo 1.1 is a major update to the popular geocoding software.
- * HoudahGeo 1.1 greatly improves over HoudahGeo 1.0 when it comes to speed, responsiveness and support for large number of images.
- * HoudahGeo 1.1 adds the ability to upload images to Flickr.com directly from within the application.

About HoudahGeo:

HoudahGeo is a one-stop geocoding application for the Mac. With HoudahGeo you may "pin" photos to the locations where they were taken. The thus created information may be exported to EXIF tags as well as to Google Earth KMZ files. Such a file allows for browsing your photos within Google Earth.

- > You don't need a digital camera with a built-in GPS
- > You don't need a GPS device

HoudahGeo is a Universal Binary application. It requires a Macintosh running Mac OS X 10.4.8, a digital camera and optionally a GPS device.

A full-featured demo version is available for download from our web site. A single user license may be purchased at the price of \$34.95.

Special Introductory Price:

For a limited time, the single user license will be on sale at only \$29.95. Starting with HoudahGeo 1.2, single user licenses will be priced \$34.95.
