Indie developer Reginald Bernardin today introduces The Waiter 1.5, his innovative new and stylistic game title for iOS. French waiter, Jean Luc has been forced to wait on all the tables by himself due to waiter shortage in the restaurant. The Waiter gives players a very unique and realistic task challenging them to use steady hands like a true waiter by using a sensitivity system that makes you balance your plate. The core game relies on balancing a plate of food from one point to another.

Hillside, New Jersey - Indie developer Reginald Bernardin has unleashed his first creation in the world of apps. The Waiter 1.5 iOS is innovative and stylistic iPhone game. The game gives players a very unique and realistic task challenging them to use steady hands like a true waiter by using a sensitivity system that makes you balance your plate. The core game relies on balancing a plate of food from one point to another.

You must keep your hands steady tilting the iPhone using the accelerometer function. If the food falls off the plate you can touch the actual food to return to its original place. The game focuses on having steady hands like a real waiter, not dropping anything. When you get to the food the customer you have successfully completed the level.
