

Agile Web Solutions releases 1Password 2.9.9 - Adds Support for Safari 4

Published on 02/25/09

Agile Web Solutions today announced the release of 1Password 2.9.9. 1Password has long been considered the most popular password manager for Mac OS X and iPhone. Version 2.9.9 includes support for the newly released Safari 4 beta. This release also includes support for the iCab web browser as well as several other important improvements. This update is recommended for all users and is a free upgrade for all paid 1Password customers.

Toronto (Ontario, Canada) - Agile Web Solutions today announced the release of 1Password 2.9.9 which includes support for the newly released Safari 4 beta. This release also includes support for the iCab web browser as well as several other important improvements. This update is recommended for all users and is a free upgrade for all paid 1Password customers.

What is 1Password?

- * The most popular password manager for Mac OS X and iPhone (according to MacUpdate, VersionTracker and iUseThis ratings).
- * Provides the ability to sync your Mac passwords with your iPhone/iPod touch.
- * A Macworld magazine "Mac Gem", rated 4.5/5 mice and nominated for a Macworld Readers' Choice Award.
- * The only password manager with integrated anti-phishing technology.
- * An automatic form filler with support for credit cards and multiple identities.
- * A highly secure database to keep track of logins, secure notes, identities, credit cards, bank accounts, and software registration information.

What is new in this release?

- * Safari 4 Support - This release adds support for the newly released Safari 4 Beta.
- * Integration With iCab - New in this release is support for the iCab web browser from Alexander Clauss.

The following is a detailed changelog that identifies all the changes and improvements made in this release:
