

Zevrix Solutions automates export to InDesign Interchange format

Published on 02/26/09

Zevrix Solutions announces the release of BatchOutput 3.5, a new version of its popular solution to automate printing and exporting from Adobe InDesign. The new version adds the ability to automate export of InDesign CS4 documents to the InDesign Interchange file format (INX). With BatchOutput 3.5, users can repurpose multiple InDesign documents to open them with earlier versions with just a click of a button instead of opening and exporting each document manually.

Toronto (ON), Canada - Zevrix Solutions announces the release of version 3.5 of BatchOutput, its popular professional solution to automate printing and exporting from Adobe InDesign. BatchOutput saves valuable production time and simplifies workflows of printers, ad agencies, service providers and publishing houses by automating the output from InDesign.

With BatchOutput, users only need to select the files to output and adjust the settings, instead of opening and printing each document manually. For example, BatchOutput can be left printing or exporting hundreds of InDesign files overnight, and the completed job can be picked up next morning.

BatchOutput also allows users to output InDesign documents as single pages, update links automatically, and output files invisibly for the user. BatchOutput automatically composes complex variable file names, which makes it equally indispensable for export of single documents as well.

The new version adds the ability to export to the InDesign Interchange file format (INX), dramatically simplifying repurposing of InDesign documents for its earlier versions.

Pricing and Availability:

BatchOutput 3.5 can be purchased from the Zevrix Solutions web site for \$119.95 (USD), as well as from authorized resellers. Demo is also available for download. Upgrade to BatchOutput 3.5 is free for licensed users of version 3.x, and \$40 (USD) for the users of earlier versions. BatchOutput 3.5 is available for Mac OS X 10.4.2 and higher, a Universal Binary, and works with Adobe InDesign CS-CS4.
