Mireth Technology updates NetShred X for Mountain Lion - v4.7.7 released

Published on 08/01/12

Mireth Technology Corp. today announces NetShred X 4.7.7, an update to its popular internet eraser software for Mac OS X. Designed to be easy-to-use, NetShred X erases files web browsers and email programs leave behind. NetShred X was designed to run automatically, without user intervention, so using the software doesn't interfere with the user's web browsing. Version 4.7.7 adds support for OS X Mountain Lion 10.8 as well as support for Firefox 14 and Safari 6.

Richmond, Canada - Mireth Technology Corp. has released version 4.7.7 of NetShred X, its easy to use internet eraser that erases internet cache, history and mail. NetShred X runs on Mac OS X.

Version 4.7.7 adds support for OS X Mountain Lion 10.8 as well as support for Firefox 14 and Safari 6.

NetShred X is easy to use internet eraser software for Mac OS X that erases files web browsers and email programs leave behind. And like all Mireth Technology products, it was designed to be easy to use. Because internet privacy software can't be effective if it's not used, NetShred X was designed to run automatically, without user intervention. And since erasing temporary internet files can take some time, NetShred X was designed to run in the background, so using the software doesn't interfere with the user's web browsing. Most importantly, NetShred X is an effective method of permanently deleting internet tracks. This is a cleaner solution than just deleting the files, because it ensures that the data can't be recovered.

Pricing and Availability:
NetShred X is available for immediate download, or on CD-ROM, starting at $24.95 (USD). Registered users of NetShred version 4 can take advantage of this free update. Educational pricing and volume discounts are available. NetShred X runs on Mac OS X. For more information, visit the NetShred product page online.
