

MathMagic Pro v8.1 for Mac Supports InDesign CS6, Pica Unit, More Fonts

Published on 08/09/12

InfoLogic today announces MathMagic Pro Edition 8.1 for Mac OS X, their award-winning mathematical equation editor. This version comes with all InDesign CS to CS6 plug-ins. It also works with many other apps such as Illustrator, Photoshop, Keynote, Pages, iBooks Author. Selected for use by thousands of large publishers and university presses, MathMagic offers high quality math expressions, converts MathType, MS Word, LaTeX, MathML, and more. v8.1 adds Pica unit and more symbol fonts, too.

Vancouver, Canada - Vancouver, Canada - Vancouver based InfoLogic, Inc. today announces MathMagic Pro Edition v8.1 for Mac OS X, their award-winning mathematical equation editor for publishers, designers, and other technical writers. This version comes with all InDesign CS ~ CS6 plug-ins in one package. It also works with many other apps and documents such as Illustrator, Photoshop, Keynote, Pages, iBooks Author, and web contents.

Selected for use by thousands of large publishers and university presses around the world, MathMagic offers easy and fast ways to write high quality math expressions, convert MathType(TM), MS Word(TM), LaTeX, MathML, and other math expressions. v8.1 adds Pica unit, more symbol fonts, user defined StyleSet path, and improved LaTeX and MathML conversion.

MathMagic Pro for InDesign comes with Plug-ins for Adobe InDesign CS ~ CS6 to enable the ability to create and edit equations right inside your InDesign document. Equations are placed in EPS format for high quality printing and PDF conversion. Automatic baseline alignment of inline equations and easy double-click re-editing are just a few of the features.

Version 8.1 adds Pica unit in font size and spacing for DTP users, includes new Italic and Bold-Italic font faces for several symbol fonts in OpenType format, supports new user-defined StyleSet directory for group-wide sharing of StyleSet files. Batch conversion now allows user to apply the default Math notation and style to reset the custom styles, and offers an improved conversion of LaTeX and MathML.

MathMagic Pro works as a stand-alone application so those equations can be used by wide range of applications as well by drag and drop or copy and paste. MathMagic is used as a hub equation editor for technical writers as MathMagic reads various industry standard equation formats, such as MathML, AMS LaTeX, LaTeX, Plain TeX, MathType, Wiki equation, Microsoft Word Equation, or graphic files saved in PDF, EPS, PICT, JPEG, GIF, BMP, WMF by MathMagic or MathType.

The superior quality and productivity of MathMagic have been selected by thousands of large publishers and university presses around the world for their publications and digital contents. Professors, students, scientists, engineers, and school districts rely on MathMagic for their daily math communication and publications.

System Requirements:

* Mac OS X 10.4 or later, including 10.8 Mountain Lion

Pricing and Availability:

MathMagic Pro Edition 8.1 is available now for \$499.00 USD (\$299.00 for Academic). Regular plus 2-year Free upgrade and Free tech support: \$695.0 (\$399.00 for Academic). A two-month Subscription license for \$100.00 is also available. Fully functional trial version is available for download.
