

## **Mien Software Releases ScreenRecord 2.1.1 - Screen Capturing Tool**

Published on 03/10/09

Mien Software announced today the release of ScreenRecord 2.1.1 for the Mac, an easy-to-use screen capturing tool that records actions on the screen as a movie. It is useful for creating training CDs, visual tutorials, and many more. ScreenRecord offers simple video editing features to cut out unwanted segments. It supports all the major movie formats so you can easily share it with your friends on the web. Version 2.1.1 addresses an issue with custom cursors.

Chico, California - Mien Software announced today the release of ScreenRecord 2.1.1 for the Mac, an easy-to-use screen capturing tool that records actions on the screen as a movie. ScreenRecord is a screen recording tool that allows the user to capture the screen as a Quicktime movie. Record anything on your computer screen: from games to web pages. It is useful for creating training CDs, visual tutorials, and many more.

Movies are processed instantly after recording. The built-in player lets you quickly view your recordings and decide what to do with it. It even has simple video editing features to cut out unwanted segments. It supports all the major movie formats so you can easily share it with your friends on the web.

Version 2.1.1 addresses an issue with custom cursors

### Key Features:

- \* Easy to use interface!
- \* Instant movie creation. No processing required
- \* Export captured movie to many other formats
- \* Record with date and time
- \* Edit the movie after capturing
- \* Capture with audio input

### Demo Limitation:

- \* The words "Demo Version" appears on the movie

### What's New in 2.1?

- \* New improved interface that floats above all apps
- \* Improved stability
- \* Minor performance improvements
- \* Fixes some minor bugs
