

## Productive Computing Announces FileMaker 10 Compatibility

Published on 03/12/09

Productive Computing, Inc. is proud to announce the compatibility of our products with FileMaker Pro 10. A new version of the Core2 CRM is now available for purchase that is not only compatible with FileMaker Pro 10 but has a few new enhancements. To download the latest versions of our plug-ins please visit our corporate site.

San Diego, CA - Productive Computing, Inc., a Platinum member of the FileMaker Business Alliance, is proud to announce the compatibility of our products with FileMaker Pro 10. Though the Core2 Invoices did not require any updates, the Core2 CRM did. For those of you using Core2 CRM version 1.0.9.0 or earlier with FileMaker Pro 10 please request a copy of the Core Fix Guide from our support department.

Please note the Fix Guide can be used on older versions of the Core2 CRM since they typically adhere to the same standards, however we can only guarantee the results with Core2 CRM v1.0.9.0. A new version of the Core2 CRM is now available for purchase that is not only compatible with FileMaker Pro 10 but has a few new enhancements. The most noticeable enhancements include:

- \* Added the SEARCH button/option to avoid the entire customer pull-down list for tasks, events or notes
- \* Completely redesigned calendar
- \* Added mechanism for handling "orphan" emails aka emails imported into Core from Outlook/Entourage that do not have an associated email address

Should you have any questions regarding the information above or would like to request the Core Fix Guide please contact our support department.

To download the latest versions of our plug-ins please visit our corporate site. A list of our products is as follows:

Address Book Manipulator Plug-in v2.0.3.2: Provides a lightning fast two-way data exchange between FileMaker Pro and Apple's OS X Address Book.

Change Printer Plug-in v3.0.3.0/3.1.2.1: Provides FileMaker(R) Pro the power to automatically change printers within your scripts. It can be used to coordinate large and complex print procedures and switch between various types of printers/drivers such as: inkjet, laser, label, and PDF.

Core2 CRM Solution v1.1.0.0: Allows you and your entire organization to intuitively manage all your company and individual contact information and can be used "as is" or can be customized to fit your specific needs.

C  
integrated with QuickBooks, this is a complete invoicing and payment module that can be added on to any FileMaker Pro database system.

Entourage Manipulator Plug-in v2.0.0.5: Exchange data within Microsoft Entourage(R) Contacts, Calendar, Tasks, and Mail (POP Accounts ONLY).

eSign Signature Capture Plug-in v1.0.3.0: Allows you to digitally capture and bind signatures to information stored in a FileMaker Pro database.

Exchange Client Manipulator Plug-in v1.0.6.0: Contains all of the functionality of the

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

Outlook Manipulator, plus the added functionality to access Exchange Server's Public Folders.

Exchange Manipulator Plug-in v1.0.6.0: Contains all of the functionality of the Outlook Manipulator, plus the added functionality to access multiple Exchange mailboxes and Exchange Server's Public Folders.

File Manipulator Plug-in v2.0.3.0/2.0.2.4: A simple utility plug-in that gives FileMaker(R) Pro the power to copy, rename, move or delete files and folders on local or networked drives.

FM Books Connector Plug-in (for use with QuickBooks) v1.0.5.1: Allows you to exchange data between QuickBooks(R) and FileMaker Pro using only a handful of script steps that do not require any knowledge of XML.

Outlook SendMail Plug-in v1.1.3.0: Sends plain text or HTML formatted e-mails with multiple attachments while suppressing the Outlook security dialog.

Outlook Manipulator Plug-in v3.0.6.0: Exchange data with Microsoft Outlook Contacts, Calendar, Tasks, Notes, Journal, Post Items and Mail.

PDF Manipulator Plug-in v2.0.4.0/2.0.3.6: Allows you to extract all text from a PDF, push and pull data from PDF form fields, combine multiple PDF documents into a single PDF file and more.
