

Ohanaware releases Funtastic Photos 1.0.4 for Mac OS X

Published on 03/11/09

Ohanaware today announced "Funtastic Photos", an update to their user friendly Photo Editor for the Macintosh platform. Funtastic Photos is a non-permanent and easily reversible photo editor, with over 50 simple to use 1-Click Styles, featuring an advanced effects engine and sharing capabilities. Version 1.0.4 includes 37 modifications to all areas of the product, including 7 new features.

Jhangle, Pingtung, Taiwan - Ohanaware, specialists in photo editing software, announced the immediate availability of an update to their flagship product "Funtastic Photos". Funtastic Photos is a user friendly Photo Editor for the Macintosh platform, with advanced effects engine and sharing capabilities. This update (free to existing customer) features 37 modifications to all areas of the product, including 7 new features!

Funtastic Photos is a 'non-permanent and easily reversible' photo editor, with over 50 simple to use 1-Click Styles, Advanced Effects engine, direct sharing via Fun Cards, Cell Phone (inc. iPhone) and popular photo sharing sites (flickr, Facebook, Picasa & MobileMe). Funtastic Photos features a creative print layouts system, with awe-inspiring projects, including photo mosaics, greeting cards, photo cubes, mini photos books and more.

What's New In Version 1.0.4:

Funtastic Photos 1.0.4 includes InstallEasy, a new technology that was created to make it easier to install and update Funtastic Photos. InstallEasy will help the user to maintain only a single copy of Funtastic Photos within the user's Applications folder. A new update system that can auto install future versions of Funtastic Photos. Red Eye Reduction system, enables the red eye to be removed from photos. Dynamic Sharpen effect, isolates the edges and makes their definition clearer, it can increase the focus on a blurry image. Funtastic Photos now uses the Apple Help for it's help system making it easier for people to view the help, as well as print it out. We've even re-organized the help menu to make it easier for people to find relevant information. The Fun Card Maker has been beefed up adding even more customization options. A more detailed list of changes can be found within the help of Funtastic Photos.

System Requirements:

Funtastic Photos requires a Power Macintosh G4, G5 or Intel based Macintosh computer, running Mac OS X v 10.4 or later. It is recommended to have at least 512 mb of RAM.

Pricing and Availability:

Funtastic Photos is available today for the price of \$34.99 (USD) before taxes. A free unlimited trial can be downloaded from Ohanaware's web site, during the trial Funtastic Photos will watermark any exported or shared photos. Ohanaware provides a wallet friendly family pack, up to 5 people can install and use Funtastic Photos, for the great price of \$49.98 (USD). Gift Vouchers are available, enabling anyone to give the gift of Funtastic Photos.
