AUSTIN, Texas (June 2, 2007) – NitroAV 'SATAStar Series' again delivers the latest 3G/sec SATA II performance and tremendous value with the versatile 4-Port PCIe Host Adapter. The latest SATAStar Series member is specifically designed for the ultra fast PCIe bus on Windows, Linux and perfect with Apple's latest PCIe based MacPro or G5 Dual-core desktop computers.

The 4-Port PCIe provides huge bandwidth for data throughput with its eight (8x) physical lane, 4x/8x electrical PCIe host connection, compatible with 4x, 8x and 16x PCIe slots. This 4-Port PCIe host adapter is designed for optimum performance and reliability required for large data storage needs as well as digital audio, digital video and graphic professionals alike. For video professionals this SATAStar adapter supports 10-bit uncompressed HD, 8-bit uncompressed HD, DV, HDV, DVPRO HD, 8-bit and 10-bit SD video workflow.

The 4-Port NitroAV 'SATAStar Series' eSATA II 3Gb/s Professional PCIe Host Adapter offers the best performance and value on the market, at \$189.95, many competing products are almost twice the price for the exact same thing. The 4-Port PCIe also supports multiple RAID levels as well as this Silicon Image 3124A based card supports Sil3726 and Sil4726 SATA port multipliers. Regardless if you are just using this card for hard drive storage/raids, backups or serious digital audio, video or graphics this card is the perfect solution for PCIe based computers.
