Directly renaming files inside those libraries can invalidate meta-data such as playlists, albums and slideshows. A Better Finder Rename has long been the most comprehensive file renaming solution for the Macintosh.

Luxembourg City, Luxembourg - publicspace.net is pleased to announce the immediate availability of version 8.1.2 of its file, music and photo renaming utility, A Better Finder Rename. The new version adds protection against accidental damage to customer's iTunes and iPhoto libraries.

Directly renaming files inside those libraries can invalidate meta-data such as playlists, albums and slideshows. The new version identifies potentially dangerous renaming locations and prompts the user to correctly export such data files before renaming them.

### System Requirements:

- \* Mac OS X 10.5 Leopard
- \* Universal Binary for Intel and PowerPC
- \* 5 MB Hard Drive space

A Better Finder Rename has long been the most comprehensive file renaming solution for the Macintosh and has transformed the tedious and time-consuming task of renaming multiple files into a simple matter of seconds for thousands of creative professionals across the world. It is based on over 10 years of listening to our users and addressing their requirements to the best of our abilities.

Version 8.0 delivered a new user interface, save-able presets, automatic software updates and a brand new multi-threaded renaming engine that enables the software to automatically resolve file name conflicts, re-order renames to avoid deadlocks and provide an improved interactive experience.

### Pricing and Availability:

A Better Finder Rename may be purchased for \$19.95 (USD). Family, Business and Enterprise licensing is also available. Customers may chose to include a "forever upgrade" with their purchase.
