

Graphicxtras plug-in updates for Illustrator (R) CS3

Published on 06/04/07

Andrew's Vector Plug-ins Collection and themed sets have been updated to Illustrator(R) CS3, for PPC and Intel (Universal Binary). 23 Volumes of plug-ins for Illustrator(R) including zoom effects, grid plug-ins, paint plug-ins, spiral plug-ins and more.

Andrew's Vector Plug-ins for Illustrator(R) have been updated for Illustrator (R) CS3, the plug-ins also work in CS2 CS and 10. The plug-ins are now for Intel and PPC Macs.

The plug-in sets include gradient plug-ins, zigzag plugin, grid plugin, perspective plug-in, paint plug-in, spiral plug-in, toolbox plug-ins, shape plug-ins, star plug-ins, contour plug-ins and zoom plug-ins.

Themed sets for Illustrator(R) are available along with a complete collection of all the plug-ins.

The plug-in sets also come with bonus material, documentation and more.

The zoom plug-in set has been updated to include new interference pattern feature for even more amazing designs + additional updates. The plug-in is excellent for illustrations, manga comics and much more.

There are now plug-in demos on the [graphicxtras.com](http://www.graphicxtras.com) site for all the sets and these can be found on the product pages.

Free updates are available for previous purchasers.
