

MaBaSoft Releases World Clock Deluxe 4.8.2

Published on 10/08/12

MaBaSoft today announces World Clock Deluxe 4.8.2, an update to their popular world time utility for Mac OS X. World Clock Deluxe comes with over 1,500 cities and 200 time zones, displays multiple clocks in a horizontal or vertical palette, in the menu bar, or in the Dock, and calculates corresponding times in different cities. Version 4.8.2 introduces clocks with light text on a dark background, fully revises World Clock Deluxe Preferences, and corrects the offset from UTC of Tokelau.

Milano, Italy - MaBaSoft today is pleased to announce the release of World Clock Deluxe 4.8.2, the latest version of their popular world time utility for Mac OS X. World Clock Deluxe is an easy-to-use and reliable time tool for companies and organizations regularly communicating with people across the world, frequent travelers, and home users having family or friends in other countries or time zones.

World Clock Deluxe displays multiple digital or analog clocks in a highly configurable horizontal or vertical palette, in the menu bar, and in the Dock, and can show the time in over 1,500 cities and 200 time zones and world times, including Coordinated Universal Time, Greenwich Mean Time, and Internet Time. It comes with a variety of date and time formats and can show times with seconds, weekday, date, date change, time zone, offset from UTC, and offset from local time.

World Clock Deluxe allows users to easily organize clocks so that they can always have a good overview of the displayed times. Colors and labels can be assigned to clocks to quickly single out the local clock or different groups of clocks. Clocks can be arranged by name, time, longitude, longitude offset, or label. Seldom used clocks can be hidden and different clocks can be displayed in the palette, in the menu bar, and in the Dock.

World Clock Deluxe helps users with phone or conference calls to other countries, foreign radio broadcasts, or online auctions with its time converter which calculates corresponding dates and times in two different cities or time zones and the time offset between them.

With World Clock Deluxe users can also easily show the weather all over the world. World Clock Deluxe downloads National Oceanic and Atmospheric Administration (NOAA) weather reports for the selected clocks or cities and displays temperature, pressure, visibility, wind conditions, and precipitations.

Version 4.8.2 introduces the possibility of showing clocks with a dark background and light text in the palette or in the Dock and fully revises the World Clock Deluxe Preferences window. In addition to that, it corrects the offset from UTC of Tokelau and updates daylight-saving time information for Samoa, the Gaza Strip, and the West Bank.

Language Support:

* US English, German, French, Dutch, and Italian

System Requirements:

* Mac OS X 10.4, 10.5, 10.6, 10.7, or 10.8 (Mountain Lion)
