

PDF Bee 3 released, now Universal, supports Adobe CS3

Published on 06/06/07

Chris Paveglio's PDF Bee program is updated to version 3.0. PDF Bee automates the creation of single page PDF files from multi-page InDesign documents. Changes include being a Universal binary, supporting Adobe InDesign CS3, and no longer needed Suitcase for font activation. \$90 for new users or only \$30 upgrade for previous users.

Chris Paveglio has updated the PDF Bee program to version 3.0. PDF Bee automates the creation of single page PDF files from multi-page InDesign documents. It watches a hot folder for InDesign files, and can export from InDesign, make a Postscript file, and/or Distill a PDF. It can be used on a network and several copies can watch one folder to speed up parallel processing for print providers, magazine publishers, and other high-volume industries.

Version 3.0 is now a Universal application. It is updated for Adobe InDesign CS3 and Distiller CS3 (8), and requires OS X 10.4. It also no longer requires Suitcase for font activation.

PDF Bee is \$90, or only \$30 for previous users.
