Automated Workflows, LLC's Automator actions for Leopard are available in application-specific packs. Trial versions of all action packs are available for download and evaluation from the Automated Workflows, LLC website.

Automator is an application that brings the power of workflow automation to the user level, with no programming required! Workflows are designed and constructed by users, by piecing together actions in a sequence, to create an assembly line of automated tasks. Once constructed, workflows may be saved and triggered in a variety of ways. With the release of these new and updated actions, Automated Workflows, LLC provides users with the ability to extend the power of Automator with actions that interact directly with their favorite creative applications.
