Published on 03/31/09

ProteMac today announced ProteMac KeyBag 1.5. ProteMac KeyBag is a stealth keystroke monitor and recorder for your Mac computer. KeyBag runs in the background, completely undetectable by the user so it won't interfere with way you work on your computer. For home and business use, ProteMac KeyBag is a useful tool for productivity and security. Version 1.5 supports warning reports via email with screenshot of desktop, sendmail settings and misc bugs fixes.

Los Angeles, USA - ProteMac today announced ProteMac KeyBag 1.5. ProteMac KeyBag is a stealth keystroke monitor and recorder for your Mac computer. KeyBag runs in the background, completely undetectable by the user so it won't interfere with way you work on your computer. For home and business use, ProteMac KeyBag is a useful tool for productivity and security.

ProteMac KeyBag is intended for interception and recording of everything that is entered from the keyboard on your Mac. ProteMac KeyBag works in the hidden mode. It is designed for hidden monitoring of computer activities. Key logger invisibly logs and is capable of recording keystrokes of every user activity performed on your Mac.

ProteMac KeyBag allows you to find out what other users do on your computer in your absence. You will find out, what was going on your computer in your absence: what was typed and the windows visited websites etc. This invisible employee spy surveillance tool records every keystroke to a database file with a user-friendly easy to use keystroke log viewer.

By constantly using ProteMac KeyBag you will save your time by preventing accidental data damage and loss. ProteMac KeyBag automatically records all typed email conversations, chat records, websites visited, password and document lists. You can immediately restore the text which was typed yesterday, the day before yesterday, or weeks ago. Using the program constantly, you can restore the previously typed text in case you have lost it.

New in version 1.5:
* Warning reports via email with screenshot of desktop
* Sendmail settings
* Misc bugs fixed.

Feature highlights include:
* Stealth and undetectable Monitoring and Recording
* Record all keystrokes typed on any application
