

Zevrix improves print queue handling in BatchOutput for InDesign

Published on 03/27/09

Zevrix Solutions today has released BatchOutput 3.5.1, a maintenance update to its popular solution to automate printing and exporting from Adobe InDesign. BatchOutput lets users accomplish their tasks faster and with less resources by automating and simplifying the output from InDesign. The new update allows changing the output job name in printer queue when printing from non-admin accounts.

Toronto (ON), Canada - Zevrix Solutions announces the release of version 3.5.1 of BatchOutput, its popular professional solution to automate printing and exporting from Adobe InDesign. BatchOutput automates and simplifies InDesign output workflow of printers, ad agencies, service providers and publishing houses.

With BatchOutput, users only need to select the files to output and adjust the settings, instead of opening and printing each document manually. BatchOutput lets users accomplish their tasks faster and with less resources. For example, BatchOutput can be left printing or exporting hundreds of InDesign files overnight, and the completed job can be picked up next morning.

BatchOutput also allows users to output InDesign documents as single pages, update links automatically, and output files invisibly for the user. BatchOutput automatically composes complex variable file names, which makes it equally indispensable for export of single documents as well.

The new update allows changing the output job name in printer queue when printing from non-admin accounts. This option is especially indispensable when sending InDesign files to printer as single pages. Using the option in previous versions could cause an error.

Pricing and Availability:

BatchOutput 3.5.1 can be purchased from the Zevrix Solutions web site for \$119.95 (USD), as well as from authorized resellers. Demo is also available for download. Upgrade to BatchOutput 3.5.1 is free for licensed users of version 3.x, and \$40 (USD) for the users of earlier versions.

BatchOutput 3.5.1 is available for Mac OS X 10.4.2 and higher, a Universal Binary, and works with Adobe InDesign CS-CS4.
