

Macware Releases DiskTools Pro - A Serious Utility for Macs

Published on 03/31/09

Macware Inc. announced today the launch of DiskTools Pro, a diverse collection of performance minded utilities featuring bad sector detection and repair, lightning-fast file defragmentation, S.M.A.R.T. monitoring and analysis, bootable disk backup with automated scheduling, and much more. Whether you are looking for a disk defrag utility or need to protect your critical data with a powerful backup tool, DiskTools Pro provides the power and flexibility you have been looking for.

Omaha, NE - Macware Inc. announced today the launch of DiskTools Pro, a diverse collection of performance minded utilities featuring bad sector detection and repair, lightning-fast file defragmentation, S.M.A.R.T. monitoring and analysis, bootable disk backup with automated scheduling, and much more.

DiskTools Pro was developed for Macware by Intech, the leading developer of disk utility software used for testing and repair by major hard drive manufacturers. Whether you are looking for a disk defrag utility or need to protect your critical data with a powerful backup tool, DiskTools Pro provides the power and flexibility you have been looking for.

DiskTools Pro is the only utility that allows you to:

- * Schedule when to defragment, backup or repair bad sectors
- * Does not require you to run the tools from a boot DVD, CD or separate volume in order to work with the startup volume
- * Can test and repair multiple volumes all at once
- * Includes full multi-user support without requiring a user to first login
- * And will not damage your system if a power failure occurs while you are running the tools

Pricing and Availability:

DiskTools Pro will be available in Apple retail stores, Office Depot, Fry's Electronics, Micro Center and other Mac software retailers, or online for an MSRP of \$79.99 (USD). More information is available on the Macware website.
