New York, New York - Chromatic Bytes, LLC announces the immediate availability of ZeusDraw 1.3.3, an update to its Mac OS X vector drawing program. ZeusDraw is a vector drawing program with a fluid, graceful interface, great brushes and a host of other features. ZeusDraw 1.3.3 adds French and Spanish language localizations. It also fixes a several minor bugs in offsetting and PDF conversion.

ZeusDraw Features:

- * Color managed (RGB and CMYK)
- * Converts PDF to editable objects
- * Full layer system
- * Both vector brushes and textured, pixel-based brushes that remain objects that can be selected, edited (path and attributes), moved, scaled and rotated
- * Easy to use path tools. Points are entered in order and can be edited at any time while the path is being created. When editing, all points are immediately editable - there is no confusing secondary selection tool
- * Gradients can be edited live, in-place on the objects they fill
- * Multi-Copy tool to place multiple copies along a line, an arc, a circle or a path
- * No text boxes. ZeusDraw has in-place editing of text, even if it has been scaled sheared or rotated
- * Construction and layout aids: Snap to Grid, Snap to Path, Snap to Point, * Snap to Angle and automatic alignment guides
- * By gesture or by the numbers. ZeusDraw allows precise setting of the size and position of objects
- * Actual size viewing. With ZeusDraw 100% means 100%
- * No size limits. If you're making a banner or a billboard, ZeusDraw will work for you
- * E-mail artwork from within the program
- * Color Picker. ZeusDraw adds a pane to the Color Picker to allow you to choose from a grid of closely related colors

Minimum Requirements:

- * Mac OS X Version 10.4 Tiger or higher
- * Universal Binary for PowerPC and Intel
