

Functns Helps Young Minds get Ahead in School and Life

Published on 10/30/12

Functns 1.1, designed by Pixelcrunchr, offers fun and exciting gameplay that helps young minds learn, practice and master multiplication tables. The app features progress tracking, a linear progression option that enhances pattern recognition skills, and shuffle/random options that aid in memory retention. Students earn achievements to represent completion of specific skill sets related to both styles of times table progression.

Cupertino, California - Parents and educators who want to provide young minds with a fun and exciting new way to learn, practice and master multiplication tables -- so they can get ahead in school and in life -- can now download the innovative new app Functns for iPad.

Designed by the award-winning team at Pixelcrunchr, Functns, which has been described by m
l
enhance pattern recognition skills, and shuffled or random tables that aid in memory retention.

Other notable Functns features include:

- * A gameplay mode that lets users earn achievements
- * The ability for parents and educators to track progress and development
- * An algebraic display of each table cell
- * Multiple user accounts to track groups of students
- * Timed table sessions for added fun and challenge

?
c
students who develop math skills also develop critical thinking, pattern recognition and memory retention abilities that help them in school, in their career, and in life overall.
