

Christmify - the perfect way to decorate your photos this holiday season

Published on 11/15/12

Winnipeg based Touche Apps today introduces Christmify 1.0, their fun new and easy-to-use entertainment app developed for iOS devices. Christmify allows people to decorate photos of family/friends with over 200 items, such as Santa Claus beards, hats and much more. There are over 20 categories of items to choose from. People can also add custom text to their creations to convey any message they desire. Creations can be shared instantly to Facebook, Twitter, Instagram and more.

Winnipeg, Canada - Touche Apps today is pleased to announce the release of Christmify 1.0, their fun new and easy-to-use entertainment app developed for iPhone, iPad and iPod touch. Christmify was developed for people who love sharing their photos on social networking sites. People can decorate their images with Santa Claus hats, beards, snowflakes, or add a reindeer and Christmas tree to their living room.

Upon launching the app, a person has the option to take a photo, select a photo from their library or select any colour as a background. The items that can be used to decorate the photo will appear at the bottom of the screen. The person can browse over 200 items across 20 categories until they find exactly what they are looking for. Placing items consists of tapping the item and then tapping the screen where they would like to place it. Items can be moved, resized and rotated using pinches and gestures. Items can also be mirrored if they desire or certain items can be placed in front of others if they are placing many items. A custom caption of various colors and fonts can be added as well.

When a person is done decorating their creation, they can share it instantly to Facebook, Twitter, Instagram, Email, MMS, or save it to their photo library.

Features:

- * Over 200 items including beards, hats, gifts and more to decorate your images
- * Add hilarious captions to your images
- * Share your creations on Facebook, Twitter, Instagram and more
- * Easy to use! Choose a category, select an image and tap to place it
- * Modify, resize and rotate your images using natural gestures
- * No hidden costs! Everything is included from the start

Device Requirements:

- * iPhone, iPod touch, and iPad
- * Requires iOS 4.3 or later
- * 39.0 MB
