

WOWODC West 2009: Annual WebObjects Conference this June 6-7

Published on 04/06/09

The WebObjects Community Association, Box Office Tickets, and MacTI are delighted to announce WOWODC West 2009, the annual conference dedicated to Apple's WebObjects Web development framework. This two day event will be held on June 6th and 7th, right before WWDC, at the beautiful Hotel Whitcomb in San Francisco. Join us for two days of learning and discussion hosted by the WebObjects community's leading experts.

Montreal, QC - The WebObjects Community Association, Box Office Tickets, and MacTI are delighted to announce WOWODC West 2009, the annual conference dedicated to Apple's WebObjects Web development framework. WebObjects is a powerful, elegant, and proven web application framework that doesn't trade agility for scalability, or elegance for capability. Think of WebObjects as Cocoa and CoreData for the web.

This two day event will be held on June 6th and 7th, right before WWDC, at the beautiful Hotel Whitcomb in San Francisco. Breakfast, lunch, and breaks (snacks, coffee, etc.) will be served each day. The sessions will be recorded and provided to attendees. Non-attendees may purchase the recordings. Join us for two days of learning and discussion hosted by the WebObjects community's leading experts.

Feature highlights include:

* Project Wonder in depth -

Project Wonder extends the core WebObjects frameworks and adds many Web 2.0 features.

* Using Maven with WebObjects -

Learn how you can use Maven to manage your WebObjects projects.

* AJAX -

No longer just a household cleanser, this buzzword has the potential to make clients, users, and the boss, very happy. Learn how easy it is to "ajaxify" apps.

* Integration with other technologies -

WebObjects is not only for HTML. Learn how you can use WebObjects as a back-end for many Web and non-Web technologies.

* Testing -

Learn how to use tools like JMeter, TestNG and Selenium to create automatic tests for your WebObjects applications.

* Deployment -

Learn how you can scale your deployment environment.

* Direct To Web -

Get an introduction on the best kept secret of WebObjects, the powerful Direct To Web (D2W) framework.

Pre-Registration:

Online pre-registration is available through boxofficetickets.com starting April 6, 2009. Tickets are \$400 USD (\$410 USD if paid by cheque). Purchase your ticket by May 6 and save \$50. Discounts for groups are also available. Complete menu and session schedule will be available by April 21. Registration will be available at the door, however we can't guarantee food or beverages.

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

We also have a sleeping room block for WOWODC guests, with special rates starting at \$109/night. Those special rates are available from June 5th to June 12th. Instructions on how to get the special rate will be available after you buy your WOWODC ticket.

Cancelation:

Full refund before May 23th 2009. No refund after May 23th 2009.

Our Sponsors:

Box Office Tickets Inc. has been empowering the event and entertainment industry through innovative "back of the house" services since 1993. Known for the quality of its customer service and technology, Box Office Tickets is a national brand with proven experience in handling all types of events: the arts, sports, business conferences, and non-profit fund-raisers. Through its website and RoBOT(R) technologies, Box Office Tickets provides a complete range of reliable and affordable solutions for order processing, admission control and data management services. MacTI is a provider of WebObjects hosting and groupware solutions. We also develop custom WebObjects applications.

The WebObjects Community Association was founded in 2007 to serve as an organizational structure and single point of contact with Apple to influence and support the continued development of WebObjects. With a focus on support and motivation, the WO Community's goal is to market WebObjects and member services in ways in which Apple is not willing and/or capable of doing.
