Camerino, Italy - One of the most flexible and advanced Interest Calculator for iPhone & iPod Touch has been released. Due to its complete set of features and maximum flexibility in the choice of what to calculate, this is the ultimate tool for people looking to detailed and complete money investment evaluation. Including inflation impact on interests evaluation, this is especially useful to program your future interest rate targets.

Interest Calculator Pro is:

- * Complete, because it supports any kind of interest options (simple, compound or continuous capitalization; fixed or yearly variable interest rates; civil year, commercial year or mixed day counting convention)

- * Flexible, allowing you to set any element of the interest equation as the unknown: thus users can either calculate the final amount, or the principal, or the interest rate, or the start date, or the end date of your investment

- * Useful, since users can also evaluate the impact of taxes on interests and inflation (many world countries past inflation rates are included for use, including US and UK past inflation rates ranging from 1900 to 2008)

The application also features a practical summary view, showing the users an year over year view of their investment plan. Finally, an handy and flexible percentage calculator is included as well. Interest Calculator Pro is localized in English, Italian, French and Spanish.

Pricing and Availability:

Interest Calculator Pro 1.0 is \$1.99 (USD) and available exclusively through Apple's App Store.
