

Dynadel releases Beauty 1.0 - Face Analysis for iPhone and iPod Touch

Published on 04/10/09

Dynadel today announced Beauty 1.0 for iPhone and iPod touch. Beauty is a simple face analysis tool used to determine how proportional and symmetric a frontal face photo is. Facial symmetry is one of a number of aesthetic traits associated with health, physical attractiveness and beauty of a person. It is also commonly referred as a factor in both interpersonal attraction and interpersonal chemistry.

Miami, FL - Dynadel today announced the release of "Beauty" for iPhone and iPod touch. The Dynadel's Beauty application is a simple face analysis tool used to determine how proportional and symmetric a frontal face photo is. Facial symmetry is one of a number of aesthetic traits associated with health, physical attractiveness and beauty of a person. It is also commonly referred as a factor in both interpersonal attraction and interpersonal chemistry.

The application computes the position and proportions of the mouth, eyes and nose of the frontal face and convert them to a value from 0 to 100 that will represent how proportional and symmetric your face is, being 100 the perfect value.

Feature Highlights:

- * An existing Image or a New Photo could be analyzed
- * Auto-detection of facial elements
- * Fast facial proportions analysis

To compute the Beauty Factor, you only need to select or take a new photo of a frontal face, the eyes, nose and mouth should be visible. After selecting the image click on a button and the process will start. That simple. The Beauty Factor is not a scientific or proven method to determine the beauty of a subject, it's only a guide and only should be used as an entertainment tool.

System Requirements:

- * iPhone or iPod Touch 2.1 or later

Pricing and Availability:

The Beauty application is only \$1.99 (USD) and exclusively available on the Apple's App Store.
