

Eltima Software improves SyncMate 1.4

Published on 04/13/09

Eltima Software improves SyncMate 1.4. SyncMate is an easy-to-use synchronizer for Mac and Pocket PC/Smartphone, that can keep all documents, text messages, contacts, calendar entries and events and other stuff well organized. Version 1.4 provides users even more synchronization opportunities than before. SyncMate Expert Edition grants even more synchronization possibilities.

Bellevue, WA - Eltima Software, a global software Development Company, has greatly advanced SyncMate 1.4 version. Synchronizing Mac to Windows Mobile devices has always been a headache for most of Mac/Windows Mobile users. With SyncMate, a new Mac to mobile synchronization tool, you can sync these devices easily and for free! SyncMate is still presented in two versions: Free and Expert, and provides all users with great synchronization possibilities as before.

SyncMate Free Edition provides users with basic and most frequently used features, such as Contacts and iCal synchronization. Besides, SyncMate Free Edition allows checking detailed device information (battery state, etc) and visually analyzing memory usage. With SyncMate Free Edition you can also read text messages directly from Mac OS X computer. For those users who need additional synchronization features Eltima Software offers SyncMate Expert Edition. This Edition is available for a small fee but grants users a wide range of sync possibilities.

With SyncMate Expert Edition users can easily synchronize iTunes and iPhoto, share Internet between Mac and Windows Mobile device and sync time. You can also synchronize separate folders and view all the applications installed on device from Mac. Notes, and To Do's synchronization is also available with SyncMate Expert Edition. More than that, SyncMate allows managing text messages right from Mac computer. Sending, receiving, creating and deleting SMS when working at Mac became possible with SyncMate Expert Edition. SyncMate installation is very easy and doesn't require device unlocking. Mac can be connected to Windows Mobile device via USB or Wi-Fi.
