

MaBaSoft Releases World Clock Deluxe 4.9

Published on 12/21/12

MaBaSoft today announces World Clock Deluxe 4.9, an update to their popular world time utility for Mac OS X. World Clock Deluxe comes with over 1,500 cities and 200 time zones, displays multiple clocks in a horizontal or vertical palette, in the menu bar, or in the Dock, and calculates corresponding times in different cities. Version 4.9 fully revises the appearance of the Clocks, Cities & Time Zones, and Time Converter panes and introduces several new Time Converter features.

Milano, Italy - MaBaSoft today is pleased to announce the release of World Clock Deluxe 4.9, the latest version of their popular world time utility for Mac OS X. World Clock Deluxe is a reliable and easy-to-use time tool for companies and organizations regularly communicating with people across the world, frequent travelers, and home users having family or friends in other countries or time zones.

World Clock Deluxe displays multiple digital or analog clocks in a highly configurable horizontal or vertical palette, in the menu bar, and in the Dock, and can show the time in over 1,500 cities and 200 time zones and world times, including Greenwich Mean Time, Coordinated Universal Time, and Internet Time. It comes with a variety of date and time formats and can show times with seconds, weekday, date, date change, time zone, offset from UTC, and offset from local time.

World Clock Deluxe allows users to easily organize clocks so that they can always have a good overview of the displayed times. Colors and labels can be assigned to clocks to quickly single out the local clock or different groups of clocks. Clocks can be sorted by name, time, longitude, longitude offset, or label. Seldom used clocks can be hidden and different clocks can be displayed in the palette, in the menu bar, and in the Dock.

World Clock Deluxe helps users with phone or conference calls to other countries, foreign radio broadcasts, or online auctions with its Time Converter which calculates corresponding dates and times in different cities or time zones.

With World Clock Deluxe users can also easily show the weather all over the world. World Clock Deluxe downloads National Oceanic and Atmospheric Administration (NOAA) weather reports and displays temperature, pressure, visibility, wind conditions, and precipitations.

Version 4.9 offers several appearance and functionality improvements:

- * Major redesign of the Clocks, Cities & Time Zones, and Time Converter panes and their dialogs
- * Dates in the Time Converter can be specified by picking them from a calendar
- * Time Converter displays additional information concerning the selected cities (time zone, extensive daylight-saving time information)
- * Possibility to copy conversions to the Clipboard so that they can be used in other applications and full configuration of the copied text
- * Possibility to automatically show the current date and time in the Time Converter
- * New icons in the World Clock Deluxe Preferences window and revision of its Date & Time Formats pane
- * Full revision of the World Clock Deluxe Help

Language Support:

- * US English, German, French, Dutch, and Italian

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

System Requirements:

- * Mac OS X 10.4, 10.5, 10.6, 10.7, or 10.8 (Mountain Lion)
- * Universal Binary for Intel and PowerPC

Pricing and Availability:

World Clock Deluxe 4.9 is a free update for registered version 4 users. It is \$10 (USD) for users who purchased version 3, and costs \$19 (USD) for new users. Family, Site, and World-wide licenses are also available.
