

Tension Software announces CryptoEdit 1.4.2

Published on 04/24/09

Tension Software has announced CryptoEdit 1.4.2 for Mac OS X. CryptoEdit is a program to create and edit protected encrypted documents. It can manage TEXT, RTF and RTFD (with images) format. It saves documents on disk always as encrypted and is the ideal solution to manage reserved documents with formatted text and images.

Milano IT - Tension Software has announced CryptoEdit 1.4.2 for Mac OS X. CryptoEdit is a program to create and edit protected encrypted documents. It can manage TEXT, RTF and RTFD (with images) format. It saves documents on disk always as encrypted and is the ideal solution to manage reserved documents with formatted text and images.

CryptoEdit is absolutely simple, powerful and secure. It allows to edit document as a normal simple word processor wich can handle text and images. All the feature available in a modern Cocoa based rich text processor are available in CryptoEdit. The text can be formatted using rules, different font, style, size, color. All the usual manipulations of fonts are available via menu and dialogs plus custom styles are available. Spelling in your native language. Text search is full implemented. Insertion of images inside the document with just drag and drop.

CryptoEdit can import from other documents in standard TEXT or RTF or RTFD (RTF images) . Documents can also be exported as TEXT, RTF or standard RTFD (included images). CryptoEdit document are saved always encrypted for security purpose. If you saved it you can be sure that you saved it encrypted. Saving a document containing images, will create on disk a single file with all the text and images encrypted in a single file. Any data the user puts in the document is encrypted and not redeable without the right password.

CryptoEdit is ideal to protect important or reserved data on any Mac. In case someone get unauthorized access to a Mac, or in the worst case a Mac is stolen, the only way to be sure your data won't be in the wrong hands is via encrytion. CryptoEdit let user use a sophisticate encryption method in a simple and easy way available to any Mac user. Except the use of the password to protect the document, you can even ignore you are using a strong crypto tool.
