

JixiPix Software Releases New Aquarella Watercolor Software for Mac

Published on 01/22/13

JixiPix Software today introduces Aquarella, its new artistic software solution for Mac OS X. Aquarella offers digital artists and photographers a way to create realistic watercolor paintings with all the delicate details true to traditional watercolor media. Featuring a revolutionary new "wet" algorithm, Aquarella can achieve a truly wet and natural appearance. The app boasts a collection of colorful washes and a series of control sliders that allow the fine-tuning each watercolor creation.

Las Vegas, Nevada - JixiPix Software today began shipping Aquarella, an artistic desktop software solution designed to help professional artists, photographers and amateurs quickly and easily achieve a natural looking watercolor painting with all the delicate details of a traditional watercolor. Aquarella overcomes limitations in other software products with a revolutionary new "wet" algorithm simulating overlapping strokes of pigment dried dark along the edges, delicate blooms and color washes to achieve a truly wet and natural appearance.

This new app available for Mac OS 10.6 provides all the creative tools needed to transform an image into a professional-looking watercolor and is the perfect compliment to a series of JixiPix artistic apps developed for digital artist, photographer and creative professionals, giving them the ability to achieve realistic watercolor creations true to a traditional aqua-media. The app also boasts a collection of colorful washes and a series of control sliders that allow the fine-tuning each watercolor creation.

At JixiPix it is our ambition is to listen closely to the creative community. Our customers have always been the driving force behind our products and come from a wide variety of professional and creative backgrounds, so we value their feedback and work hard to create products to fit their specific needs.

Watercolor Styles

- * Aquarella - Classic watercolor style using the original colors from the photo
- * Two Tone - Replaces the original photo colors with two pastel ones; or allows users to choose two from the built-in color picker

Key Features:

- * Two professional-quality watercolor styles
- * Aqua Color: a traditional watercolor style uses original colors from the image then applies fluid brush strokes and colorful washes
- * Two Tone: a bichromatic style washes your image with soft color combinations using two predetermined colors that can be easily customized to a complimentary color using the built-in color picker
- * Choose between a natural color palette or a two color one
- * Make adjustments to Color Details, Wet Edges, Color Palettes, Paper Styles and more
- * Achieve thousands of watercolor styles by simply adjusting the settings, colors and washes
- * Fine-tune with easy-to-use slide controls
- * Use large photos for a high-end result
- * Choose a preset for a quick start or make your own for future projects
- * Saves images as TIF, PNG, JPG

Device Requirements:

- * Mac OS X 10.6 or later
- * 118 MB
