

## **Stellar Launches Drive Monitor - Real Time Health Monitor for Your Drive**

Published on 02/06/13

Stellar Data Recovery today introduces Stellar Drive Monitor, a user friendly scanning, monitoring and backup utility. The all new Stellar Drive Monitor constantly runs in the background and is packed with useful features. This efficient tool scans and monitors your drive to identify possible problems and issue warnings intelligently. The software also performs a surface scan to identify bad sectors and has the ability to read SMART attributes for an overall health assessment of your drive.

Edison, New Jersey - Stellar Data Recovery, global leaders in data recovery software, today launched Stellar Drive Monitor, a user friendly scanning, monitoring and backup utility. This efficient tool scans and monitors your drive to identify possible problems and issue warnings intelligently. The software also performs a surface scan to identify bad sectors and has the ability to read SMART attributes for an overall health assessment of your drive. The utility is available in a try before buy version, with almost all its features available for 30 days.

"Increase in hard disk temperature is one of the most common reasons for hard disk failure that results in crucial data loss. This comprehensive tool constantly monitors these temperature variations along with 70 other crucial parameters to intimate users about imminent threats to hard drive health so that users can take timely backup of important data." said Sunil Chandna, CEO, Stellar Data Recovery.

The all new Stellar Drive Monitor constantly runs in the background and is packed with useful features. User can scan the surface of the hard disk to detect bad sectors through the surface scan feature and can also view real time disk information about their drive's performance. This tool allows customization as well, different users can set their desired preferences for temperature warning limits and other functions to keep track of their drive's health based on their requirement and usage. This utility is compatible with the latest Mac OS X Mountain Lion & former versions.

### Pricing and Availability:

Stellar Drive Monitor is available as a 'try before buy' version which can be immediately downloaded from Stellar Data Recovery online. The software's single user license is available at a nominal price of \$29.00 (USD) which also allows users to access the drive performance and back up features.
