Maidenhead, UK - Softalk today announces Spreadsheet 2.0, a major update to their popular spreadsheet creation tool for iPhone and iPod Touch. Spreadsheet offers all the features you need to create a professional looking spreadsheet. It provides a scrollable zoomable view, along with cell formatting features and a host of standard spreadsheet functions. The application features a standard grid, which may be scrolled and zoomed. Text, numeric or date values or formulas may be entered into the selected cell through the formula bar at the top of the screen.

Version 2.0 now provides support for XLS format and multiple worksheets, making it possible to share files with Excel, Apple Numbers, NeoOffice and other popular desktop spreadsheet applications. Although Spreadsheet version 2.0 now uses XLS as its native format, it is also capable of importing files in XML Spreadsheet format and CSV format, giving its users more compatibility with their existing spreadsheet files.

The new version also includes improvements such as:

- \* Cell Merging
- \* Unlimited Rows and Columns
- \* Faster transfer of workbooks between the desktop and the device
- \* Improved Emailing of Spreadsheets
- \* Several additions to the supported functions

System Requirements:

iPhone or iPod Touch 2.0 or later

Pricing and Availability:

Spreadsheet 2.0 for iPhone is only \$7.99 (USD) and available exclusively through Apple's App Store. For more information, visit Spreadsheet's website online.
