

Classic Laser Puzzle Game Aargon Finally Arrives on the iPad

Published on 02/11/13

Bonfab Technologies and Twilight Games today introduce Aargon Lasers 1.0, their new classic laser puzzle game for iPad. Aargon Lasers brings to the iPad all 240 puzzles from the PC version plus the added freedom to attempt any level and automatic saving of current progress. Based on the science of optics and light, the seemingly simple goal of directing colored lasers using various play pieces such as mirrors, prisms, and refractors, belies the fiendish challenge to complete a difficult level.

Montreal, Canada - Bonfab Technologies and Twilight Games today are thrilled to announce the worldwide release of Aargon Lasers for the iPad, available on the Apple App Store. Aargon Lasers is a modern version of the perennially popular puzzle game Aargon, now enhanced by a touch interface. Based on the science of optics and light, the seemingly simple goal of directing colored lasers using various play pieces such as mirrors, prisms, and refractors, belies the fiendish challenge to complete a difficult level.

Faithful fans of this now-classic brain game have been playing it for over 10 years. The current generation of so-called brain training games that are said to enhance cognitive reasoning and increase memory are part of a long tradition of games that are won by smarts, not fast reflexes.

"Many Aargon fans have spoken and they wanted to play Aargon on their iPads," said a spokesperson for Bonfab Technologies. "We're really excited that putting Aargon on the iPad also exposes the game to a whole new audience."

Aargon Lasers brings to the iPad all 240 puzzles from the PC version of Aargon Deluxe plus the added freedom to attempt any level and automatic saving of current progress. There are now versions of Aargon for PC, Mac, iPhone, iPad, Palm and Pocket PC.

Device Requirements:

- * Compatible with iPad
- * Requires iOS 3.2 or later
- * 7.4 MB
