

SweetP Productions Releases eMail Address Extractor v1.3 for Mac OS X

Published on 02/12/13

SweetP Productions today announces eMail Address Extractor 1.3, an update to their popular eMail recovery utility for Mac OS X. With no configuration required, eMail Address Extractor allows you to extract valid eMail addresses from virtually any kind of text file. eMail Address Extractor is super easy-to-use; just drag and drop files to recover all unique eMail addresses. Easily retrieve addresses from your entire Apple Mail database, iWork projects, docx, xlsx, and from within zip archives.

Surfers Paradise, Australia - SweetP Productions today is pleased to announce the release of Email Address Extractor v1.3, an update to their eMail recovery utility for Mac OS X. Email Address Extractor v1.3 is available for purchase through both the Mac App Store, and the SweetP Productions Store.

eMail Address Extractor allows you to extract valid eMail addresses from virtually any kind of *text file. No configuration required, it just works! Select your output file format, then Drop data files onto eMail Address Extractor to quickly produce a non-duplicate list of all valid email addresses.

Easily retrieve addresses from your entire Apple Mail database, iWork projects, docx, xlsx, and from within zip archives. Email Address Extractor can be configured to also retrieve emails contained from the text within Apple Mail emails. Remove addresses from a list by selecting an alternate list to remove.

Note: PDF files need to be in a text format. OCR data retrieval is not currently supported.

Device Requirements:

- * Mac OS X 10.7.5 or later
- * 2.2 MB disk space

Pricing and Availability:

Email Address Extractor 1.3 is \$29.99 USD (or equivalent amount in other currencies) and available worldwide through the Mac App Store in the Business category. eMail Address Extractor v1.3 is also available from the SweetP Productions Store. A trial version can be downloaded from SweetP Productions online.
