

OmNom Apps Releases Spy Words - Decode and Decipher Cryptograms

Published on 02/27/13

California based OmNom Apps today introduces Spy Words, their fun and addictive logic game for iOS devices. Spy Words brings cryptogram applications to a whole new level with an engaging user interface and hundreds of unique puzzles. Substituting the correct letters for the ones jumbled in the puzzle, players must determine what the correct phrase is. Phrases are taken from popular culture and fit within a variety of categories including wisdom, food, and comedy.

Los Angeles, California - Today OmNom Apps released Spy Words, a fun and addictive logic game on the iTunes App Store for iPhone(TM), iPod(TM) Touch, and iPad(TM). Spy Words brings cryptogram applications to a whole new level with an engaging user interface and hundreds of unique puzzles. This mobile game joins the growing catalog of applications published by OmNom Apps, including the popular Anagram Twist.

In Spy Words, players find themselves in the role of investigators and code breakers. Here, they are given an encoded phrase to decipher. Substituting the correct letters for the ones jumbled in the puzzle, players must determine what the correct phrase is. Phrases are taken from popular culture and fit within a variety of categories including wisdom, food, and comedy. Players also have the ability to use hints which reveal all the cases of a particular vowel. The fewer hints used on a puzzle, the more one will get in return.

"I think people will find Spy Words challenging but not too hard. It just has the right level of difficulty to make it fun for both casual and hardcore gamers. This is the kind of game that players will find hard to put down because once you've solved a single puzzle, the feeling is really rewarding, and makes you want to play more," says Nick Delos Santos Jr.

Device Requirements:

- * iPhone 3GS, 4, 4S, iPhone 5, iPod touch and iPad
- * Requires iOS 4.3 or later
- * 36.7 MB
