

## Your Ultimate Free Guide To The Cayman Islands Is SpotCayman

Published on 02/27/13

SpotCayman has the power to change your trip to the Cayman Islands, whether you are staying on island or visiting for the day on a cruise. Downloadable on your iPhone and iPad, you can have all of the Spots Nearby your location, a currency converter and maps with street detail all at your fingertips now in version 3.0. The most comprehensive guide for the Cayman Islands is Free and available on the App Store.

Toronto, Canada - SpotCayman has the power to change your trip to the Cayman Islands, whether you are staying on island or visiting for the day on a cruise. Downloadable on your iPhone and iPad, you can have all of the Spots Nearby your location, a currency converter and maps with street detail all at your fingertips now in version 3.0. The most comprehensive guide for the Cayman Islands is FREE and available on the App Store.

TekSocial touts the SpotCayman app as "... your ultimate FREE iPhone guide to Cayman Islands." SpotCayman has OVER 250 restaurants, 78 wifi hotspots, all hotels, shopping, island attractions, tours, doctors, churches, car rental agencies, grocery stores, gas, liquor stores and the list goes on. The app is full of information for a stay in the Cayman Islands of Grand Cayman, Little Cayman and Cayman Brac.

Among the new features in the new release of SpotCayman 3.0 Conch Pearl Media is leading innovation with their newest feature of "Spots Nearby", where users can see a location and see ALL of the businesses, restaurants, beaches or attractions that are within walking distance from that spot. The maps on SpotCayman have street detail and SpotCayman is the ONLY app for the Cayman Islands with this feature that works both online and offline. Users can map one spot or map hundreds at the same time on Grand Cayman, Cayman Brac or Little Cayman. A user is able to view a location and see their location with GPS tracking capability.

Another new feature is a currency converter to change USD to CI and vice versa. No more guessing at prices while in a store or a restaurant.

SpotCayman also now has the ability to share Spots via Facebook, Twitter, Sina Weibo, Message and email that works straight from the app.

Developer Lisa Butcher of the SpotCayman app says that the search function in the app is proving to get rave reviews from its users. People using the app can search anything from vegetarian, gluten free, budget restaurant, water view restaurant, seafood, webcam, news, breakfast, banks, events, dive sites, gyms, local artists ... the list is endless and the users love it!

As usual SpotCayman has all of the functionality a visitor to Cayman would need: all content can be viewed instantly, from anywhere, without an internet connection (even the maps), they can telephone a Spot with just a single tap (on iPhone) to make inquiries or reservations, go to the website of a Spot, send emails to a Spot, and save places in "Favourites".

Anyone travelling to Grand Cayman, Cayman Brac or Little Cayman needs to have the SpotCayman app, it will direct you to all of the off the beaten track places and restaurants found nowhere else. Best of all, SpotCayman is free!
