

## **PresentYourApps working again under 10.4.10**

Published on 06/24/07

After having worked only partly on 10.4.9, Eternal Storms Software today confirmed that PresentYourApps can provide full functionality again under Mac OS X 10.4.10. PresentYourApps is available in version 2.0.

PresentYourApps is an application which uses a "hidden" feature of Mac OS X. So you can hide the menu bar and / or the Dock for every Cocoa application, providing you with more screen real estate. Users can choose from four options: "Hide Dock", "Remove Dock", "Hide menu bar and Dock", "Remove menu bar and Dock". (The last two options haven't been working on Mac OS X 10.4.9).

PresentYourApps 2.0 requires Mac OS X "Tiger" 10.4 or higher and can be downloaded from the website [www.eternalstorms.at/presentyourapps](http://www.eternalstorms.at/presentyourapps). PresentYourApps is freeware, but the author greatly appreciates donations.
