

## **MathMagic Pro v8.5 for Mac Includes New Plug-ins and New Symbol Fonts**

Published on 03/27/13

InfoLogic today releases MathMagic Pro 8.5 for Adobe InDesign, their award-winning equation editor for Mac OS X. MathMagic Pro is a standalone multi-purpose equation editor for mathematical equations and scientific symbols. It also comes with InDesign Plug-ins to let InDesign use MathMagic as an equation editor within InDesign. Version 8.5 adds new Symbol fonts, direct drawing option for vertical and horizontal Fences, new Plug-ins for InDesign CS5~CS6 for batch applying of StyleSets, and more.

Vancouver, Canada - Vancouver based InfoLogic, Inc. today announces MathMagic Pro 8.5 for Adobe InDesign, their award-winning mathematical equation editor for publishers, designers, and technical writers. MathMagic Pro is a multi-purpose equation editor which works with wide range of apps and documents such as InDesign, InCopy, Illustrator, Photoshop, Keynote, Pages, iBooks Author, and web editors.

This version adds support for direct drawing of vertical and horizontal Fences for fine control over the Fence shape and thickness which is useful for very tall or wide Fences, various Frame types with corner decoration options, includes new Symbol fonts, more Sigma shapes, and more.

v8.5 also comes with new Plug-ins for InDesign CS5, CS5.5 and CS6 to enable batch applying of StyleSets to multiple equations right within InDesign documents. User can apply a new StyleSet to one or more equations with an option to specify the scope, such as drag-selected area, equations in the current Text Box, equations in the current page or in the whole document. This feature dramatically improves the productivity when it is necessary to change a font, font size, spacing or equation shape for hundreds of equations placed in InDesign documents.

InfoLogic also introduces a new MathML converter solution to convert equations linked or embedded in XML/HTML files into MathML. This solution is available for further customization for several XML based workflows.

MathMagic Pro for InDesign comes with Plug-ins for Adobe InDesign CS ~ CS6 to enable the ability to create and edit equations right inside your InDesign document. Equations are placed in EPS format for high quality printing and PDF conversion. Automatic baseline alignment of inline equations and easy double-click re-editing are just a few of the features.

MathMagic Pro works as a stand-alone application so those equations written in MathMagic can be used by wide range of applications by drag and drop or copy and paste. MathMagic reads and writes various industry standard equation formats, such as MathML, LaTeX, Plain TeX, MathJax, ASCIIMath, MathType, Wiki equation, Microsoft Word Equation, or files saved in PDF, EPS, PICT, PNG, JPEG, GIF, BMP by MathMagic or MathType. MathMagic reads mathematical expressions and symbols aloud via Text-To-Speech so it is also widely used for special education.

The superior equation quality and productivity of MathMagic have been selected by publishers and technical writers around the world for their publications and digital contents. Professors, students, scientists, engineers, and school districts rely on MathMagic for their daily math communication and education.

### System Requirements:

- \* Mac OS X 10.6 or later, including 10.8 Mountain Lion
- \* Intel Macintosh

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

**Pricing and Availability:**

MathMagic Pro Edition 8.5 is available now for \$499.00 USD (\$299.00 for Academic). Regular plus 2-year Free upgrade and Free tech support: \$695.00 (\$399.00 for Academic). A two-month Subscription license for \$100.00 is also available. Fully functional trial version is available for download.
