

Zevrix introduces auto-serialization in InPreflight 2.6.10 for InDesign

Published on 05/11/09

Zevrix Solutions today announces the release of InPreflight Pro 2.6.10, an update to its quality control, packaging automation and file info reporting solution for Adobe InDesign. InPreflight quickly gathers extensive information about document fonts, colors and links and lets users instantly locate potential problems according to preflight presets. The new version allows system administrators to automatically serialize InPreflight Pro for large-scale distribution.

Toronto (ON), Canada - Zevrix Solutions announces the release of InPreflight Pro 2.6.10, a maintenance update to its quality control, packaging automation and file info reporting solution for Adobe InDesign. InPreflight quickly gathers extensive information about document fonts, colors and links and lets users instantly locate potential problems according to preflight presets. InPreflight Pro also includes a powerful packaging automation engine which allows users to preflight and package multiple documents.

Among other abilities, it can collect all files into one folder, eliminating the need to collect the same links multiple times for each design. The savings can result in gigabytes of space and hours of production time. In addition, InPreflight lets users create interactive graphic PDF reports with the detailed InDesign document info and preflight results.

The new update allows system administrators to automatically serialize InPreflight Pro for large-scale distribution. System administrators with large-scale installations of InPreflight Pro can now include their site's serial number with their distribution of InPreflight Pro. Users will be prompted to activate InPreflight Pro upon first use, but will not require administrative privileges to activate and use the software.

System Requirements:

InPreflight Pro is available for Mac OS X 10.4.2 and higher, a Universal Binary, and works with Adobe InDesign CS-CS4.

Pricing and Availability:

InPreflight Pro 2.6.10 can be purchased from the Zevrix Solutions web site for \$139.95 (USD), as well as from authorized resellers. A low-cost version, InPreflight Studio is also available for \$99.95. Demo is available for download. Upgrade to InPreflight Pro 2.6.10 is free for licensed users of version 2.x, and \$40 for the users of earlier versions.
