

## How Artificial Intelligence Will Change the Way You Learn Languages

Published on 04/03/13

Lingualia presents Lingu 1.0, a virtual language teacher with the power to learn from each and every student and adapt the course to perfectly fit their needs. This achieves a noticeable increase in motivation, and a much faster progress with very little effort. Lingualia learns from the user; he studies their behaviour, their progress, the time they have available to learn, and their motivation and applies that information to the design of completely unique learning experiences.

Valencia, Spain - Lingualia, the social network for language learning presents Lingualia 1.0, a language teacher who uses artificial intelligence to personalise the course to match the exact requirements of each student, with web and iphone versions.

Lingualia learns from the user; he studies their behaviour, their progress, the time they have available to learn, and their motivation and applies that information to the design of completely unique learning experiences.

Sergio Blanco, CEO of Lingualia, points out, "At Lingualia, the student isn't forced to adapt to the course; the course adapts to the student. This way, students' motivation increases and they achieve a much faster progress with a lot less effort."

### Student-Focused Learning:

The motivation and requirements of every language learner vary dramatically, as does the rate of progression and understanding. That's why Lingualia has developed Lingualia, a virtual teacher, programmed with artificial intelligence, tailored to each student, with the ability to analyse all aspects of their learning capacities to create a personalised course for each user.

The student learns from their mistakes thanks to the explanations that Lingualia provides. This method eliminates the need to follow a strict course which is always the same from student to student and not at all tailored to each person's requirements.

Lingualia's algorithm, which is based on artificial intelligence, learns from each student and has the capacity to take decisions in order to personalise the learning process.

### How Does Lingualia Work?

At Lingualia, every student can learn languages with natives, with didactic material created by language professionals, and learn with Lingualia - the intelligent teacher. Lingualia offers English and Spanish courses.

What's more, it's flexible; you can make the most of your free time and connect whenever you want, for just five minutes, or even an hour, and you can learn wherever you want.

Language Support:  
English and Spanish

### Device Requirements:

- \* iPhone 3GS/4/4S/5, iPod touch (3rd/4th/5th generation), and iPad
