

For Our Children's Safety

Published on 04/16/13

The CHILDTRAC Personal GPS System allows parents to stay in touch with your loved ones with an easy to use iPhone application and affordable Personal GPS Tracking device. The tracking device carried by the child allows the parents to know their child's location, communicate with their child and much more. CHILDTRAC is running a spring promotion on the GPS Trackers for a limited time.

Spring Hill, Florida - Every good parent has asked the questions "Where is my child and are they safe?" CHILDTRAC has introduced a GPS Tracking System that gives parents the peace of mind by keeping them in touch with their loved ones. A FREE iPhone app for the parent and an affordable communication and GPS tracking device for the child is all that is needed to feel the Freedom, Security and Certainty that comes with knowing where your loved one is located and that they are safe.

The CHILDTRAC Personal GPS System allows parents to easily locate their child's location and view it on a map, discretely listen-in to their child's surrounding area, communicate with their child with a 2-Way calling feature and be alerted if their child encounters an emergency situation or crosses a pre-configured virtual boundary or exceeds a pre-configured speed.

Download the free iPhone app today and try the demo tracker included in the app to see how simple and intuitive the CHILDTRAC Personal GPS System is to use. For more information, please visit our website.

Device Requirements:

- * iPhone 3GS and above
- * iOS 4.3 and above
