

## **Aquafadas unveils PulpMotion 1.2**

Published on 06/28/07

PulpMotion 1.2 adds new features and improves performances in Aquafadas' innovative slideshow and presentation tool. For the ones that couldn't make it to the DeliciousGeneration party during WWDC, no regrets; now it's their chance to discover the latest features of PulpMotion.

MONTPELLIER, FRANCE - June 25 2007 : PulpMotion 1.2 adds new features and improves performances in Aquafadas' innovative slideshow and presentation tool.

For the ones that couldn't make it to the DeliciousGeneration party during WWDC, no regrets; now it's their chance to discover the latest features of PulpMotion:

- \* New soundtrack options for the video during playback,
- \* Great performance increase in the media manager: scrolling through thousands of images is now really quick
- \* New in the player: you can now export a player animation as a screensaver
- \* Support for external camera and microphone
- \* and more....

### About PulpMotion:

PulpMotion, a new Mac OS X application from Aquafadas gives users a simple yet powerful new option for designing and sharing, in a few clicks, striking videos slidedows that integrate personal photos, videos and music.

The animations produced with PulpMotion can be emailed through an interactive postcard, loaded onto an iPod, used as a personalized screensaver, exported as high quality QuickTime movies, or published to a website using iWeb.

A video is available to discover what PulpMotion is all about:
