Published on 04/24/13

Stellar Data Recovery today announces an update to Stellar Phoenix JPEG Repair for Macintosh. A complete solution to repair JPEG images and thumbnails, Stellar Phoenix JPEG Repair comprehensively scans the media and will repair corrupt photographs without modifying original data. The file repair process is completely automated now. The upgraded version offers a faster scanning and recovery engine, is capable of extracting thumbnails from completely unusable or corrupt JPEG files and more.

Edison, New Jersey - Stellar Data Recovery, a renowned name in the data recovery industry, today is proud to announce the release of 'Stellar Phoenix JPEG Repair' for Mac. This is an upgraded version of the tool that was launched earlier to repair damaged JPEG/JPG image files which are rendered unusable and inaccessible due to file corruption. The advanced version has a faster scanning and recovery engine than the previous version and has a better user experience. The upgraded version is capable of extracting thumbnails from completely unusable or corrupt JPEG files without affecting the file properties. The file repair process is completely automated now and is able to provide a distinction between thumbnails and repaired images.

"JPEG is the most commonly used file format to save images from digital cameras, mobile phones etc, as it successfully compresses heavy images. These files are prone to corruption due to reasons like virus infection, power failures or erratic file transfers, etc. 'Stellar Phoenix JPEG Repair for Mac' is an advanced tool which repairs JPEG images flawlessly & easily" said Mr. Sunil Chandna, CEO Stellar Data Recovery.

Stellar Phoenix 'JPEG' Repair for Mac' is available for a FREE download as a try before buy software. The free version is capable of repairing JPEG files with a preview. The full version allows users to save repaired files. The upgraded version has an enhanced graphic user interface too for better user experience. Users can preview repaired images after scanning. Multiple JPEGs can be scanned in lesser time and results can be saved at a desired location after the repair is complete.

Pricing and Availability:

The free version of the software can be downloaded from Stellar Data Recovery online. The full version is available at an affordable price of \$39 (USD).
