

Cloud Office on App Store - Real Desktop with iPad by GOST

Published on 04/30/13

GOST today announces Cloud Office 1.5 for iPad. Cloud Office is an easy to use, yet complex solution for transforming an iPad into a real Mobile Office with a complete documents processing cycle, including viewing, editing, converting, storing, surfing & exchange tools. The app offers additional menu access to such popular features as clipboard operations and more. Version 1.5 introduces a new Gesture recognizer, with the Messenger interface separated to an independent page for user convenience.

Monte-Carlo, Monaco - GOST today is thrilled to announce the release and immediate availability of Cloud Office 1.5 for iPad. Cloud Office is an easy to use, yet complex solution for transforming an iPad into a real Mobile Office with a complete documents processing cycle, including viewing, editing, converting, storing, surfing and exchange tools.

Cloud Office provides the user with a ready-to-go remote desktop system, with full featured office pack, files management and conversion tools, flash-enabled browser and professional email client. The application offers additional menu access to such popular features as clipboard operations, an undo action and delete button emulation. The office pack allows users to edit, store and convert most of popular document formats, desktop style file and archive managers - access and organize user's files. It also contains a Remote Desktop embedded web browser and email client allow to surf flash containing sites and enjoy fast internet connection speed.

The product was designed to implement a Native Clouding philosophy that gives not only storage space, but shares server side resources between mobile users to meet new mobility level challenge. The Remote Desktop layout and controls adopted for iPad resolution and touchscreen usage. Remote Desktop applications interface is familiar to most of users and inherits desktop visuality concept.

Multilayer security model prevents user data and files unauthorized access. Servers location provides outstanding datacenter room access protection. For years iPad mobility and usability level rules the Tablet PC market and sets its horizons. With Cloud Office iPad owners receive new level of functionality for this outstanding product.

Version 1.5 introduces a new Gesture recognizer, with the Messenger interface separated to an independent page for user convenience.

"We targeted to create safe and powerful product that will cover all light and mid-weight needs for business customers, working outside their office and combine privacy, security, functionality and computing power of server based systems with mobility and comfort of iPad together with product cost efficiency and usability." said GOST CEO Andrey Prozorovskiy
