

baKno Games releases PunkTrader 1.0 - Stock Trading Game

Published on 05/22/09

baKno Games today is proud to announce the release of PunkTrader 1.0, a stock trading game that allows to test any gamer's trading skills on real historical stock market price movements. PunkTrader randomly picks one of the 20 most actively traded stocks and takes the gamer to 9:30 am Wall-Street time at the beginning of a random trading day within the last 5 years. Once the game starts, the gamer battles against the price movements of the stock by buying and selling shares.

Key Biscayne, Florida - baKno Games is proud to announce the release of PunkTrader 1.0, a stock trading game that allows to test any gamer's trading skills on real historical stock market price movements. PunkTrader randomly picks one of the 20 most actively traded stocks and takes the gamer to 9:30 am Wall-Street time at the beginning of a random trading day within the last 5 years.

Once the game starts, the gamer battles against the price movements of the stock by buying and selling shares at will, and the sole objective is to make a profit. To do that, the gamer needs to use a keen predictive trader eye, and also a few assisting indicators included in the game such as moving averages, exponential averages, industry averages and trade volume.

Minimum Requirements:

- * Mac OS X Version 10.2 or higher
- * Universal Binary for PowerPC and Intel
- * 23 MB Hard Drive space

PunkTrader is available for Mac OS X as well as Windows. Gamers can choose between three different game modes: Quick Play, Training and Career. In Career mode, PunkTrader saves the accumulated profit or loss at baKno's servers, allowing the gamer to keep track of his/her trading performance, and compete for the wealthier position at the leader-board.

Pricing and Availability:

A full-featured demo version is available for download from the baKno website. Single seat licenses are priced at \$19.95 (USD). There is also a promotional two-seat license available for \$29.95 (USD).
