

Tropical Software Releases TopXNotes touch 1.2.3 for iOS - New

Published on 05/17/13

Tropical Software has announced TopXNotes touch 1.2.3, an update to their award-winning personal note managing system for Mac, iPhone, iPod touch and iPad. TopXNotes touch for iPhone features basic note creation and editing in landscape and portrait modes, direct emailing of notes from the app, backup/restore to the device, clickable hot links, and note synchronization with TopXNotes for Mac. This version has numerous fixes and improvements.

Atlantic Beach, Florida - TopXNotes touch 1.2.3 for iPhone, iPad and iPod touch, with NoteZoom, is available in the Apple iTunes store. With the release of 1.2.2 we added 4-way sorting to the NoteOrganizer (note list.) TopXNotes touch 1.2.3 is our most stable, easiest to use version of TopXNotes touch, with performance enhancements, bug fixes, and a NoteSync process that is a snap to set up. The TopXNotes system will keep your notes synchronized between TopXNotes for Mac and TopXNotes Touch for iPhone and iPod touch.

TopXNotes touch 1.2.3 has major improvements to our WiFi based NoteSync process for improved efficiency, stability and performance including improved handling of large files, files with many notes and improved handling of other unusual conditions.

Finally, TopXNotes touch 1.2.3 now checks for compatible NoteSync services between Mac and iOS device and will not attempt sync between incompatible versions. If you suspect a problem be sure you have the latest versions on iOS and Mac.

This release is the latest advance in a series of companion products we plan to release for Apple touch devices. Be sure to also try our note organizing solution for Mac notes, TopXNotes for Mac, today.

TopXNotes touch features note creation and editing in landscape and portrait modes, emailing a note, backup/restore to the device, clickable hot links, and note synchronization (NoteSync) with TopXNotes for Mac. You also have full access to all fonts and font sizes Apple offers in iOS. Now you can also have your notes "on the go", create new notes, edit notes, delete some and keep them in sync with your Mac's notes.

In this release NoteOrganizer (note list) now can be sorted by note title or date, ascending or descending for either. Other changes include changing the user interface default fonts to a more popular font. The NoteOrganizer list titles, list dates, search, email, and the default note font are now the preferred iOS system font (Helvetica.) Also in TopXNotes touch 1.2.2 we made even more changes to accommodate retina display and new screen sizes in iPhone 5 and iPad 3.

This release of TopXNotes touch for iPhone and iPod touch, with retina graphics updates, compliments the release of TopXNotes 1.7.5, the latest update to its award-winning personal note manager for Macintosh. When combined with TopXNotes for Mac customers can synchronize notes between one Mac and multiple devices running TopXNotes touch including iPhone, iPod touch and/or iPad.

TopXNotes touch also works perfectly with Apple's latest iOS 6 and TopXNotes touch even supports the latest iOS spell checking. With NoteZoom you can adjust the font size on the go as you hurry to the next destination. Included in NoteZoom is the ability to choose from all of the fonts supported in the iOS.
