

PixelEspresso releases Decloner 1.0 for Mac OS X 10.5 Leopard

Published on 05/24/09

PixelEspresso today released Decloner 1.0, their utility to find and delete duplicate files. It uses a reliable algorithm to determine if files are identical. The names of duplicate files are presented in a list to allow the user to select which files to delete, either individually or in bulk. Decloner has a simple interface, can quickly process large number of files on internal or external drives, supports QuickLook and exclusion patterns.

London, United Kingdom - PixelEspresso has released Decloner (TM) 1.0, an easy-to-use utility to find and eliminate duplicate files on Macintosh computers running Mac OS X 10.5 Leopard. Decloner uses a reliable secure hash algorithm (SHA-1) to determine if files are identical. It has a convenient and easy-to-use interface, and can quickly process large number of files on internal or external disks.

Decloner presents the list of duplicate files to the user and allows to delete files either one by one, or mark several files and delete them all at once. The user can inspect files and view their contents using Leopard's QuickLook feature. Decloner never deletes files permanently. Instead, it moves files into the Trash so that the user can always restore them if necessary. Decloner supports file name exclusion lists and setting minimum file size to ignore small files. Sparkle auto-update feature is included for user convenience.

Features:

- * compares files using SHA-1 hash algorithm for reliability
- * has simple and straightforward user interface
- * can process large number of files quickly
- * displays file information and supports QuickLook
- * allows deletion of individual files as well as marking multiple files for bulk deletion
- * moves deleted files into the Trash to enable the user to restore them if necessary
- * supports file name exclusion lists
- * ignores files smaller than the user-defined size

Minimum Requirements:

- * Mac OS X Version 10.5 Leopard or higher
- * PowerPC or Intel-based Macintosh
- * 5 MB free disk space

Pricing and Availability:

Decloner has 30-day free trial period and costs \$19.95 (USD) per user.
